

Sustainable Paper Sourcing Statement

As leading Australian manufacturers of corrugated cardboard packaging, Abbe Corrugated Pty Ltd and Abbe NSW Pty Ltd are FSC® and PEFC CoC certified.

Our commitment to supplying customers with sustainable resourced packaging uses a combination of recycled and kraft liners. These are sourced from Local and International paper manufacturers that are FSC (Forest Stewardship Council®) and/or PEFC (Programme for the Endorsement of Forest Certification) certified.

The materials used to manufacture our corrugated cardboard packaging are considered 100% recyclable and can be sent to any recycling facility to be made into renewable fibre board liners and/or corrugated cartons. Furthermore, the materials are also biodegradable and will break down easily back into the environment.

We constantly investigate opportunities to use materials and technology which maintains and/or enhances our manufacturing process, which may further minimise our environmental impact, and maintain customer safety.
